SUBJECT INDEX TO VOLUME 26

Analytical microscopy

Zone-axis critical voltages and large-angle electron diffraction at 200–400 kV, *Steeds* 26 (1988) 1

CBED and CBIM from semiconductors and superconductors, *Humphreys, Eaglesham, Maher and Fraser* 26 (1988) 13

Determination of structure factor phase invariants from non-systematic many-beam effects in convergent-beam patterns, *Høier, Zuo, Marthinsen and Spence* 26 (1988) 25

Determination of the symmetry of charge-density-wave modulations in $TaTe_4$ by HREM, *Corbett, Hiltz, Boswell, Bennett and Prodan* 26 (1988) 43

On the use of convergent-beam electron diffraction for identification of antiphase boundaries in GaAs grown on Si, *Liliental-Weber, Weber, Parechanian-Allen and Washburn* 26 (1988) 59

Earth science applications of ALCHEMI, *Smyth and McCormick* 26 (1988) 77

Electron channeling analysis of aluminium and xenon-implanted aluminium, *Rossouw, Potter and Glanvill* 26 (1988) 87

Microcrystallography using electron channeling: structure factor phase information and crystal site determination, *Tafto and Gjønnes* 26 (1988) 97

Localization effects on quantification in axial and planar ALCHEMI, *Spence, Kuwabara and Kim* 26 (1988) 103

An efficient analytical method for calculating the angular and energy distribution of electrons which have undergone plural scattering in amorphous materials, *Johnson and Isaacson* 26 (1988) 271

The characterization of structural variations within a crystal field, *Frank, Chiu and Degn* 26 (1988) 345

The contribution of inelastically scattered electrons to high resolution images of (Al,Ga)As/GaAs heterostructures, *Boothroyd and Stobbs* 26 (1988) 361

Numerical evaluation of lattice parameters from high-order Laue zone lines in convergent-beam electron diffraction disks, *De Blasi, Di Giulio and Manno* 26 (1988) 377

Separation of overlapping core edges in electron energy loss spectra by multiple-least-squares fitting, *Leapman and Swyt* 26 (1988) 393

Detectors, photographic and other

Skew thoughts on parallelism, *Christenson and Eades* 26 (1988) 113

Channeling effects from impurity atoms in the high-angle annular detector of the STEM, *Treacy, Gibson, Short and Rice* 26 (1988) 133

Diffraction and optical diffraction

Zone-axis critical voltages and large-angle electron diffraction at 200–400 kV, *Steeds* 26 (1988) 1

CBED and CBIM from semiconductors and superconductors, *Humphreys, Eaglesham, Maher and Fraser* 26 (1988) 13

Determination of structure factor phase invariants from non-systematic many-beam effects in convergent-beam patterns, *Høier, Zuo, Marthinsen and Spence* 26 (1988) 25

Measurement of phase invariants in three-beam diffraction, *Bird and James* 26 (1988) 31

Nanometer-area electron diffraction of semiconductor superlattices in transmission electron microscopy, *Tanaka and Mihama* 26 (1988) 37

CBED measurements of lattice mismatch for sub-micron quaternary structures grown on indium phosphide substrates, *Twigg and Chu* 26 (1988) 51

On the use of convergent-beam electron diffraction for identification of antiphase boundaries in GaAs grown on Si, *Liliental-Weber, Weber, Parechanian-Allen and Washburn* 26 (1988) 59

Investigation of amorphous materials by electron diffraction – the effects of multiple scattering, *Anstis, Liu and Lake* 26 (1988) 65

Quantitative comparison of convergent-beam electron diffraction (CBED) patterns, *Fan* 26 (1988) 71

Electron channeling analysis of aluminium and xenon-implanted aluminium, *Rossouw, Potter and Glanvill* 26 (1988) 87

Microcrystallography using electron channeling: structure factor phase information and crystal site determination, *Tafto and Gjønnes* 26 (1988) 97

Dynamical calculation of RHEED rocking curves for Ag(001) and Pt(111), *Zhao and Tong* 26 (1988) 151

Electron diffraction conditions for surface imaging, *Lehmpfuhl and Uchida* 26 (1988) 177

The observation of surface resonance effects in RHEED patterns, *Peng, Cowley and Yao* 26 (1988) 189
Computer-simulated electron microdiffraction patterns from MgO crystal surfaces, *Pan and Cowley* 26 (1988) 205
Plasmon diffuse scattering in dynamical calculations for RHEED – a method of introducing inelastic scattering in the multislice theory, *Wang and Lu* 26 (1988) 217
Diffuse diffraction spots in RHEED patterns, *Peng and Cowley* 26 (1988) 227
REELS and RHEED characterizations of electron resonance channeling in crystal surfaces, *Wang and Cowley* 26 (1988) 233
Delocalization corrections for electron channeling analysis, *Pennycook* 26 (1988) 239
Electron multiple inelastic scattering in the geometry of RHEED, *Wang* 26 (1988) 321
The characterization of structural variations within a crystal field, *Frank, Chiu and Degn* 26 (1988) 345
Numerical evaluation of lattice parameters from high-order Laue zone lines in convergent-beam electron diffraction disks, *De Blasi, Di Giulio and Manno* 26 (1988) 377

Electron energy loss spectroscopy
Electron channeling analysis of aluminium and xenon-implanted aluminium, *Rossouw, Potter and Glanvill* 26 (1988) 87
Microcrystallography using electron channeling: structure factor phase information and crystal site determination, *Taftø and Gjønnes* 26 (1988) 97
Localization effects on quantification in axial and planar ALCHEMI, *Spence, Kuwabara and Kim* 26 (1988) 103
Plasmon diffuse scattering in dynamical calculations for RHEED – a method of introducing inelastic scattering in the multislice theory, *Wang and Lu* 26 (1988) 217
REELS and RHEED characterizations of electron resonance channeling in crystal surfaces, *Wang and Cowley* 26 (1988) 233
Delocalization corrections for electron channeling analysis, *Pennycook* 26 (1988) 239
An efficient analytical method for calculating the angular and energy distribution of electrons which have undergone plural scattering in amorphous materials, *Johnson and Isaacson* 26 (1988) 271
Separation of overlapping core edges in electron energy loss spectra by multiple-least-squares fitting, *Leapman and Swyt* 26 (1988) 393

High resolution
Determination of the symmetry of charge-density-wave modulations in $TaTe_4$ by HREM, *Corbett, Hiltz, Boswell, Bennett and Prodan* 26 (1988) 43
Profile and plan-view imaging of reconstructed surface structures of gold, *Ikarashi, Kobayashi, Koike, Hasegawa and Yagi* 26 (1988) 195
A very simple method for simulating useful high resolution diffraction patterns, *Dorignac and Li* 26 (1988) 249
The contribution of inelastically scattered electrons to high resolution images of (Al,Ga)As/GaAs heterostructures, *Boothroyd and Stobbs* 26 (1988) 361

High voltage
A very simple method for simulating useful high resolution diffraction patterns, *Dorignac and Li* 26 (1988) 249
High-precision tilt stage for the high-voltage electron microscope, *Turner, Barnard, Matuszek and See* 26 (1988) 337

Image processing, 3D reconstruction
The reconstruction of helical particles with variable pitch, *Bluemke, Carragher and Josephs* 26 (1988) 255

Imaging
Contrast transfer theory for non-linear imaging, *Bonevich and marks* 26 (1988) 313
Deflection of STEM electrons by dielectric spheres, *Rivacoba and Echenique* 26 (1988) 389

Instrumentation
Growth and current characteristics of stable protrusions on tungsten field ion emitters, *Jousten, Böhringer, Börret and Kalbitzer* 26 (1988) 301
High-precision tilt stage for the high-voltage electron microscope, *Turner, Barnard, Matuszek and See* 26 (1988) 337
Ideal lenses and the Scherzer theorem: a supplement, *Shao and Crewe* 26 (1988) 385

Methods and techniques
Separation of overlapping core edges in electron energy loss spectra by multiple-least-squares fitting, *Leapman and Swyt* 26 (1988) 393
Electrolyte for jet-thinning martensitic steel containing precipitates, *Kestel and Wiggins* 26 (1988) 405

New developments
THEED studies of adsorbed xenon on graphite, *Venables, Faisal, Hamichi, Hardiman, Kariotis and Raynerd* 26 (1988) 169

Particles optics, theory
Contrast transfer theory for non-linear imaging, *Bonevich and Marks* 26 (1988) 313
Ideal lenses and the Scherzer theorem: a supplement, *Shao and Crewe* 26 (1988) 385

Reflection electron microscopy, high-energy electron diffraction
Determination of surface step distributions on Ge using RHEED, *Cohen and Pukite* 26 (1988) 143
Dynamical calculation of RHEED rocking curves for Ag(001) and (Pt(111), *Zhao and Tong* 26 (1988) 151
Surface resonance effects and beam convergence in REM, *Peng and Cowley* 26 (1988) 161
Electron diffraction conditions for surface imaging, *Lehmpfuhl and Uchida* 26 (1988) 177

Scanning transmission electron microscopy
Channeling effects from impurity atoms in the high-angle annular detector of the STEM, *Treacy, Gibson, Short and Rice* 26 (1988) 133
Deflection of STEM electrons by dielectric spheres, *Rivacoba and Echenique* 26 (1988) 389

Specimen preparation
A preparation technique for TEM cross-sections of test structures with reduced feature size, *Garulli, Armigliato and Finetti* 26 (1988) 295
Preparation of narrow amorphous ribbon specimens for transmission electron microscopy, *Cabanillas and Versaci* 26 (1988) 335

Surfaces, clusters, interfaces and particles
On the use of convergent-beam electron diffraction for identification of antiphase boundaries in GaAs grown on Si, *Lilientat-Weber, Weber, Parechian-Allen and Washburn* 26 (1988) 59
Determination of surface step distribution on Ge using RHEED, *Cohen and Pukite* 26 (1988) 143
Surface resonance effects and beam convergence in REM, *Peng and Cowley* 26 (1988) 161
THEED studies of adsorbed xenon on graphite, *Venables, Faisal, Hamichi, Hardiman, Kariotis and Raynerd* 26 (1988) 169
Electron diffraction conditions for surface imaging, *Lehmpfuhl and Uchida* 26 (1988) 177
Profile and plan-view imaging of reconstructed surface structures of gold, *Ikarashi, Kobayashi, Koike, Hasegawa and Yagi* 26 (1988) 195
Computer-simulated electron microdiffraction patterns from MgO crystal surfaces, *Pan and Cowley* 26 (1988) 205
Deflection of STEM electrons by dielectric spheres, *Rivacoba and Echenique* 26 (1988) 389

Abstracts/Announcements/Reviews/Miscellaneous
Special issues, edited volumes and much else, *Hawkes* 26 (1988) 327
Special announcement 26 (1988) 409
